54		198	x		x		x		x		5		x		x		x		50-65	We agree with the proposal but it is confusing with numbers of items of equipment - 10 on letter. Are current items being replaced? Using wood for picket fencing will fit in with the landscape but maintained, painted, stained etc. Benches, shelters not shown on the plan. Car parking spaces create a meeting point for late night parking and noise? Overall agree with the proposal - good need to maintain green open spaces for free play and exploration of nature. Environmental aspect. Area used by all walkers - not only dog walkers.			
55		201	x		x		x		x		5+		x		x		x		50-65	Fully agree with all feature of play equipment. Feel strongly that there should be a playing area good to get scheme up and running soon so people can enjoy it. One concern is security - will take a lot goes on these days.

																							resulted in either the closure of play areas or restrictions on times of use. It would be expedient to site further away. Either the existing equipment is moved or taken away. Q2. No to ariel cableway at this site. Would be safer to have this at the Sports and Rec field. To be safe for disabled children. Q3. Siting too close to the houses. See no mention of trees for shade. Q4 & 5. Parish Council are incorrect when they state that having a car park will alleviate parking issues for those who currently uses the Leys park on this very narrow lane. Those who park on Brick Lane other than school personnel and parents of school children. A large car park will attract more people to park on the lane they can drive and park to use the playground, finding it full, will further exacerbate the current situation on the lane with many residents walking on the road - potentially very dangerous for walkers. No lights mentioned on these proposals. Believe that 2 designated disabled car spaces is more than adequate for our village. It is also important for emergency vehicles onto the site to be taken into consideration. Vehicular access to the field is very worrying. Sports and Rec Field - £450K has been already spent on an area that is barely used is of great value. A car park (locked) which could perhaps be used as a space for teachers and a drop off and pick up point for the school. Car park is only ever used for occasional football match. It has a pavillion which is a great ideal location for some play equipment, especially for siblings who can amuse themselves whilst waiting for their parents. Wholly inadequate in ascertaining the wishes of parishioners. The only questions pertaining to a car park is a netball pitch incorporated onto the tennis court? Other sports activities including keep-fit, outdoor gym etc. Notes on the consultation - Play equipment group is not made up of members of the public. It is not the public who had to fight hard to be admitted. It really worries me when facts are not reported and groups decision together with the backing of the parish council is totally erroneous. Who is the parish council referring to? There is no conclusive evidence that all parishioners received this questionnaire - not all residents? The reality is that whilst most of us agree that it may be a lovely idea to have a design for a car park considered beforehand. There are currently at least 3 play areas on the new estates, most of which are the one near the Co-Op. I am surprised that personal information page is on the back of the consultation. Parish Council would not know who had written what? Does this mean that the District Council would need to in order to pass on the results to the Parish Council? I hope that the information I have provided covers some of the issues raised.
